

About Detroit Radiant Products Company

For more than half a century, Detroit Radiant Products Company has been setting the standard for high quality, cost effective, energy efficient infrared heaters. Our Re-Verber-Ray® brand products are recognized as a solution for most commercial, industrial and specialty applications.

Our Warren, Michigan headquarters occupies more than 125,000 ft² of space and includes a dedicated press room, five production lines, a certified testing laboratory, a classroom and 20,000 ft² of office space. This facility is supported by a global network of associate companies which collectively provide an unparalleled production platform.

Family owned and operated for three generations, Detroit Radiant Products Company has a trusted and talented network of employees and representatives. Our attention to detail and customer satisfaction has helped to make us a recognized leader of energy-efficient infrared heating products.

Trademarks and Associations

For innovative product initiatives.

On-Site Testing Laboratory

An on-site ISO/IEC 17025 certified testing laboratory enables research of the latest technological advancements as well as in-house CSA product certification and review. This resource allows for continuous research and development efforts enabling Detroit Radiant

Products Company to stay at the forefront of infrared and other modern day energy technologies.

Dedication to Education

The proper application of an infrared heater requires a working knowledge of the basic principles of infrared. Detroit Radiant Products Company is committed to continuous educational efforts. Annual training seminars may focus on the ABC's of infrared, the development of our distribution network, safety and/or specialized classes designed for professional installers or licensed state inspectors.
